HIGH-SPEED MIXER

Superior Mixing and Quiet Operation

High-Speed Mixer for Superior Mixing and Quiet Operation

Our high-speed mixer offers excellent mixing performance and quiet operation, even at high speeds. Equipped with a high-performance air-seal shaft to prevent dust and liquid leakage, its #300 polished interior makes cleaning easy. The mixer's powerful air-blow function minimizes material residue during discharge, ensuring efficiency and cleanliness.

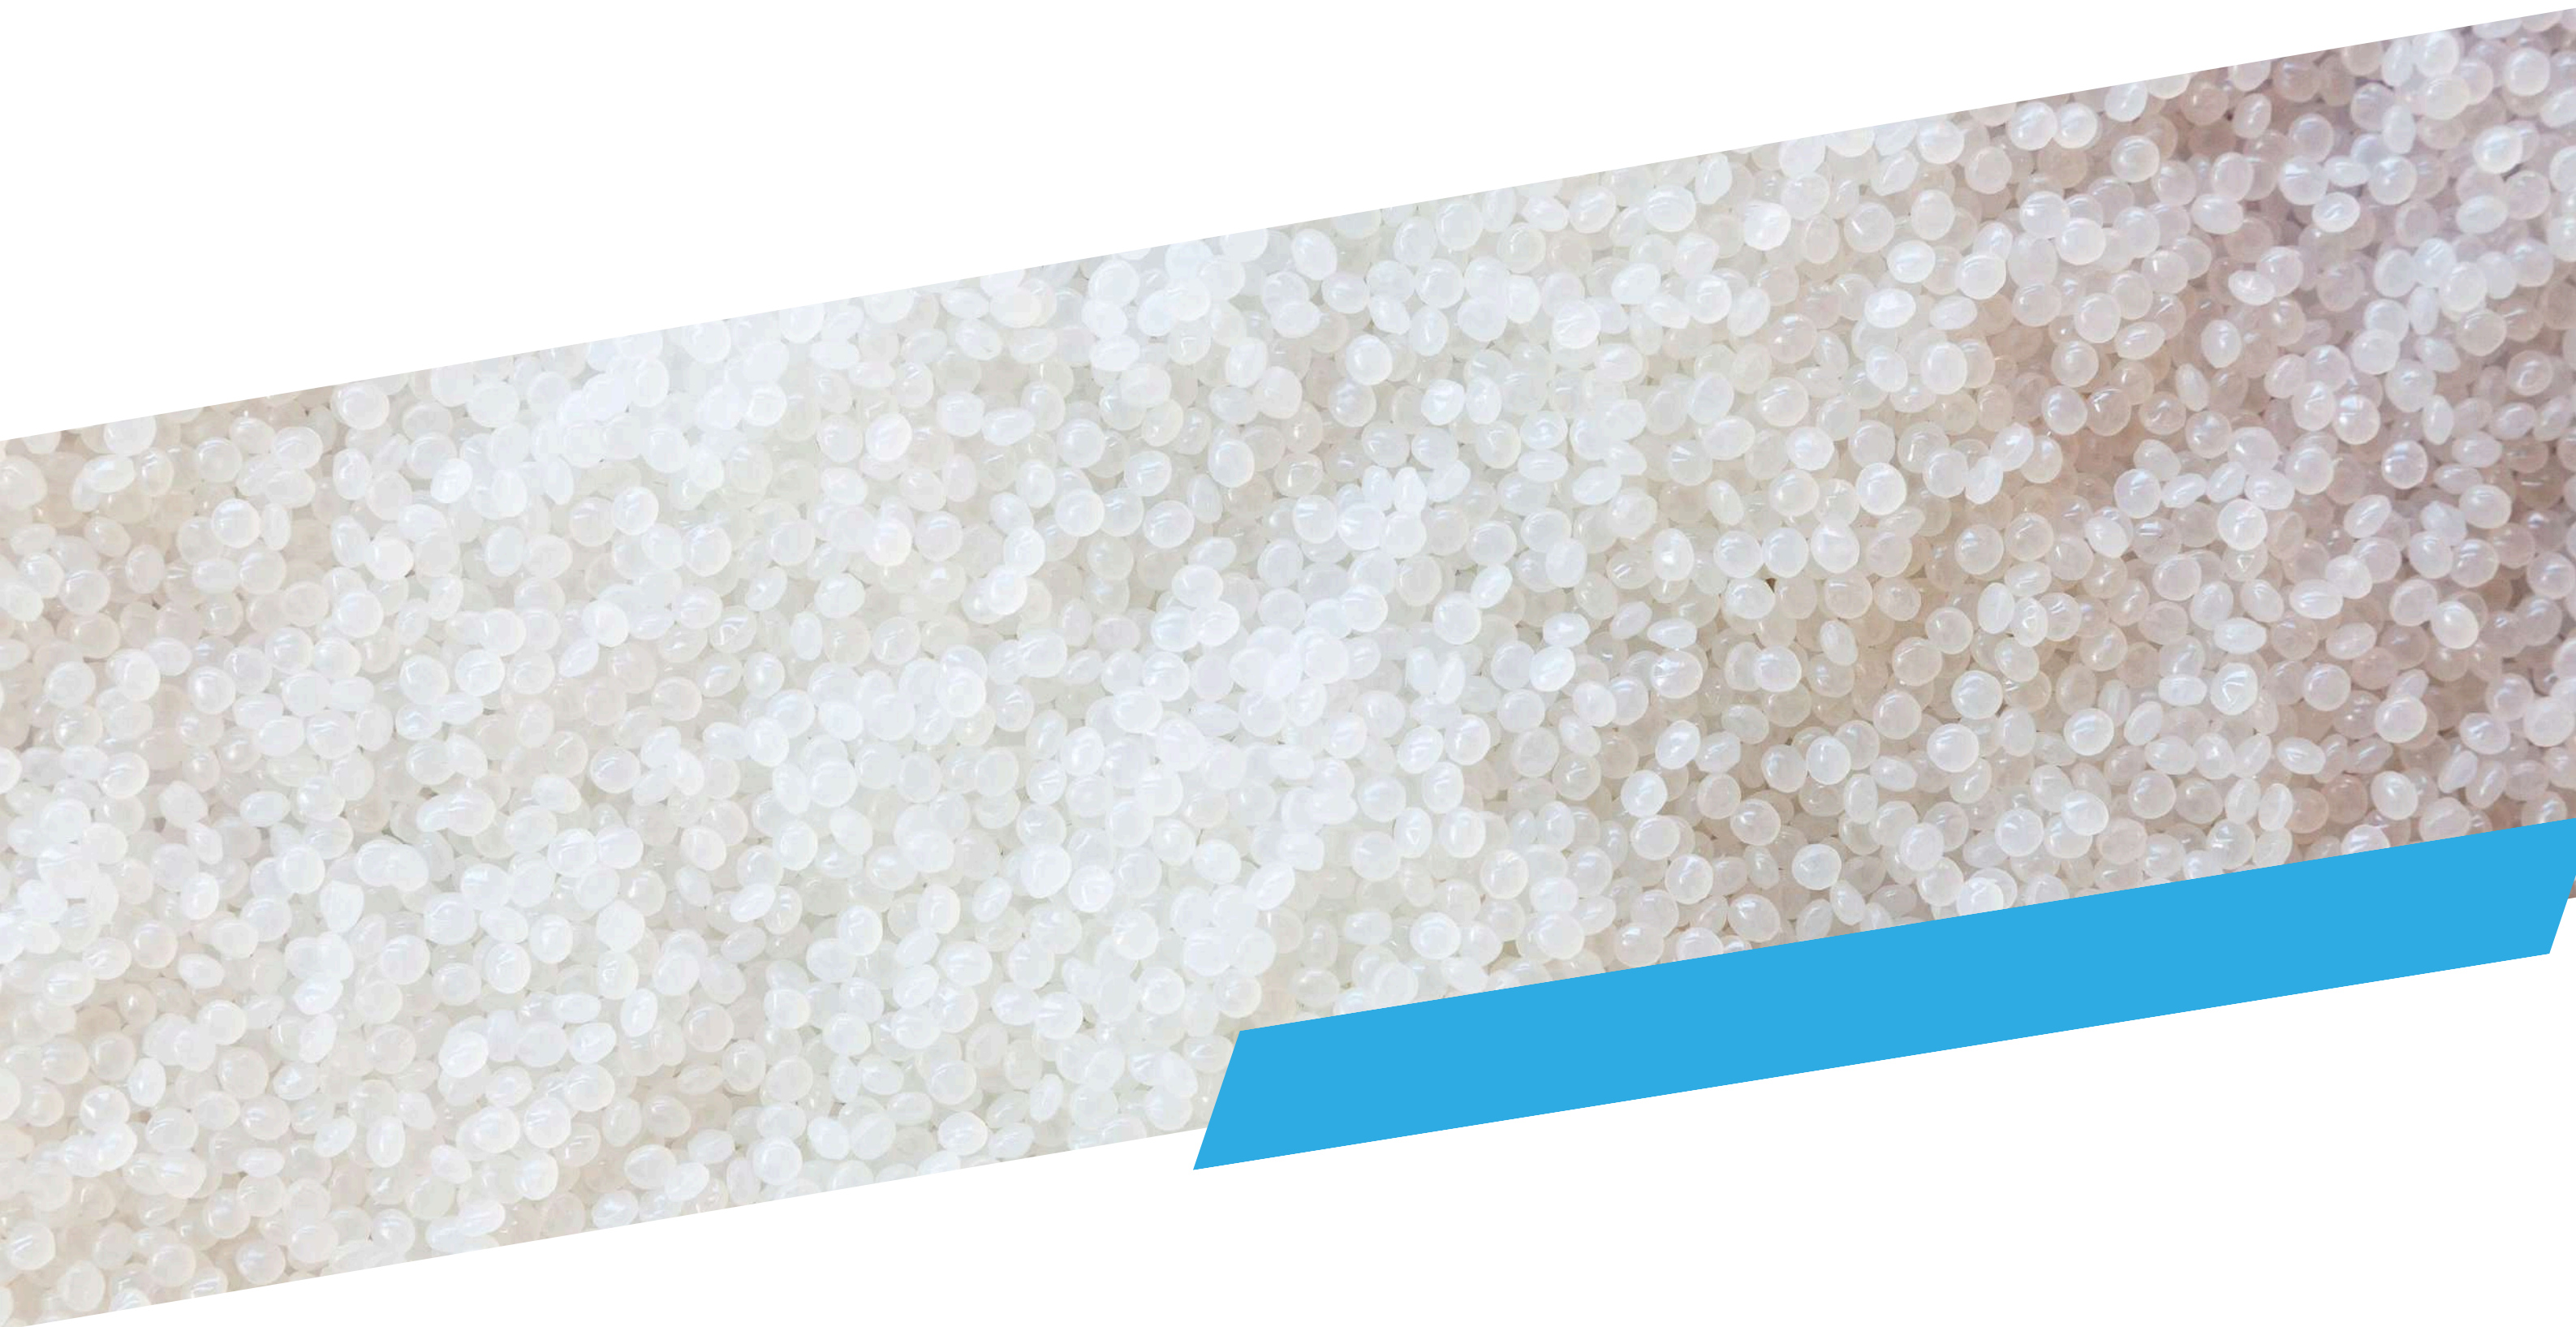

#Peripheral

Durable and Versatile Mixer Technology

The high-speed mixer's versatile rotating blades handle a wide range of materials, including powders, pastes, liquids, and granules. Designed for high durability, the blades are coated with wear-resistant steel for extended life. The mixer's jacketed body allows for precise temperature control, making it suitable for industries such as chemicals, food, and pharmaceuticals.
